Case Studies: What Works, What to Watch Out For, and How to Encourage Success

A Symposium presented by The Rockfall Foundation and UConn Climate Adaptation Academy

Sponsorship Opportunities

The Rockfall Foundation's annual symposium is a half-day educational program designed to support well-informed planning and decision making so that development is both resilient and sustainable. The 2018 event will provide an opportunity to examine actual development projects that utilize environmentally friendly techniques in order to learn how effective they've been and how best to encourage successful projects. *Please see the attached program detail.*

The symposium audience includes local elected and appointed officials, land use planners, architects, developers, engineers, conservationists, landscape architects, educators, students, and all concerned with climate change and effective community planning.
